

Studio LED light 192

Model: 10104267

Manufacturer: NEEWER

EAN: 6921268818067

Product Code: 1341698

R2,236

NEEWER NL-192AI Bi-Color LED Light with Rechargeable Battery

The NEEWER NL-192AI is an LED panel with a maximum power of 20 W that offers adjustable color temperature ranging from 3200 to 5600 K and smooth dimming from 0 to 100%. The design incorporates 192 LEDs—96 yellow and 96 white—allowing you to adjust the lighting from warmer to cooler tones. The high CRI/TLCI rating of 97+ ensures accurate color rendering, and the maximum illuminance is 2400 lx at a distance of 0.5 m and 660 lx at 1 m.

Soft light across the entire surface

Edge Lit technology provides soft, evenly distributed light that covers the entire surface of the panel. The built-in, non-removable diffuser further diffuses the light, eliminating the need to install a separate component before starting work. This solution makes it easy to quickly set up lighting for video recording, photography, and other applications requiring a controlled light source.

Color Temperature and Brightness Control

The color temperature range from 3200 to 5600 K allows you to adjust the lighting to various conditions and achieve both warm and cool light. Brightness can also be adjusted across the full 0–100% range, making it easy to select the appropriate lighting level for a specific shot. A CRI/TLCI of 97+ promotes natural color reproduction, which is particularly important when filming or photographing products, faces, and other subjects where accurate color representation is essential.

Built-in 8000 mAh Battery

The panel can operate without constant access to a power outlet thanks to its built-in 8000 mAh lithium battery. Battery life is up to 90 minutes, or about 1.5 hours, while a full charge takes 120 minutes. Indoors, the light can be powered by a 15 V 2 A DC power supply, while outdoors it can run on battery power.

180° Adjustable Angle

The NEEWER NL-192AI allows you to tilt the panel within a 180° range, enabling you to direct the light exactly where it's needed. An easy-to-use knob lets you quickly tighten and secure the selected setting. Two mounting options further increase the flexibility of panel configuration when setting up a photo or video shoot.

Quiet operation and slim design

An efficient heat dissipation system allows the panel to operate at a low noise level, which is particularly useful when recording audio. The housing measures 26.8 × 18.8 × 2.6 cm and weighs 580 g, making the panel relatively slim and easy to carry. The ability to use both an AC adapter and a built-in rechargeable battery allows for convenient use indoors and when working outdoors.

Included

- LED panel x1
- Cold shoe adapter x1
- US charger x1

Manufacturer	NEEWER
Model	NL-192AI
Product Type	LED panel / LED video light
Color Temperature	3200–5600 K
Light Type	Bi-color
CRI	97+
TLCI	97+
Maximum power	20 W
Number of LEDs	192
LEDs	96 yellow + 96 white
Maximum illuminance at a distance of 0.5 m	2400 lx
Maximum illuminance at a distance of 1 m	660 lx
Brightness control	0–100%
Battery capacity	8,000 mAh
Battery type	Built-in lithium battery
Operating time	90 min / 1.5 h
Charging time	120 min
Power supply	DC 15 V 2 A
Diffuser	Built-in, non-replaceable
Lighting technology	Edge Lit
Tilt adjustment	180°
Mounting options	2
Dimensions	26.8 × 18.8 × 2.6 cm
Weight	580 g
