Product Code: 1341701

R1,897

NEEWER Small Table Tripod (Red)

This compact aluminum alloy tripod provides stable support while taking photos and recording, yet remains easy to transport. It offers height adjustment from 17 to 50 cm, a maximum load capacity of 5 kg, and a low-profile 360° rotating ball head. When folded, it's just 17 cm long and weighs 700 g, making it easy to take with you to a photo shoot or on a trip.

Flexible Height Adjustment

The five-section legs allow you to freely adjust the tripod's height to suit your shot and the surrounding conditions. The adjustment range from 17 to 50 cm makes it easy to frame shots from a low angle or work with the camera positioned higher up. Additionally, the extendable center column allows you to increase the height by 10 cm, which is ideal for shots taken from above.

Low-angle photography

The minimum height of 17 cm allows you to position the camera close to the subject or surface. This design makes it easier to take macro photos from a short distance and to compose shots from a low angle. The adjustable design provides greater freedom in setting up your equipment without the need for a large, full-size tripod.

360° Rotating Ball Head

The low-profile ball head allows for smooth 360° rotation of the camera, enabling you to comfortably frame your shot and take panoramic photos. The built-in bubble level helps you ensure your equipment is properly aligned, and the Arca-Swiss quick-release plate allows you to quickly attach or remove your camera. The tripod uses a standard 1/4-inch thread.

Stable Placement on Various Surfaces

The 3-step leg angle adjustment lets you adjust the legs' position with the push of a button, increasing flexibility when setting up the tripod on a table or desk. Non-slip feet help maintain a stable position while taking photos and recording video. The durable yet lightweight aluminum body supports a load of up to 5 kg, allowing for the mounting of a wide range of cameras and camcorders.

For Cameras, Camcorders, and Smartphones

The tripod is compatible with many DSLR cameras, mirrorless cameras, camcorders, and smartphones. It works with equipment from brands such as Canon, Nikon, Pentax, Panasonic, Sony, Samsung, and Olympus, as well as other digital SLR cameras. The camera or phone shown in the product images is not included in the set.

Included

- Aluminum alloy tripod
- Instruction manual
