Efficient and powerful hair reduction

Immediate results visible after 2 weeks

eHPL™-technology

Our award winning eHPL™ patented technology combines two unique energies. Galvanic energy opens the pores to enable the Optical energy, the light energy, to optimally target the hair follicles at the root.

Dual Energy

As inventors of home used IPL, we used our knowledge to create a device with 100% power. The Silk'n 7 uses two lamps to ensure maximum coverage and intensity. The most efficient way for hair reduction with ultimate control of power output.

Silk'n AutoAdapt technology

Silk'n 7 uses advanced skin sensor technology that reads your skin tone right before every flash.
