GODOX AD300Pro II Flash for Godox Mount

The GODOX AD300Pro II is a versatile, 300 Ws outdoor flash that combines high performance with portability and convenience for off-site use. Its compact design, weighing approximately 1.2 kg (with battery), a fast recycling time of 0.01–1.5 s, TTL support, and HSS synchronization up to 1/8000 s make it ideal for portrait, commercial, and editorial shoots on location. The high-capacity battery allows for approximately 350 full-power flashes on a single charge, so you can work longer without having to frequently replace batteries. Its compact size makes it easy to transport, and the flash fits easily into a camera backpack, giving you complete freedom to work in any location.

Precise light control and intuitive operation

The AD300Pro II offers power adjustment over a range of 10 f-stops, from 1/512 to 1/1, with 0.1 EV precision, allowing you to perfectly match the flash intensity to any scene. A bright color screen, a sturdy metal dial, and a clear button layout allow for quick adjustments even during fast-paced photo shoots. An additional convenience is the 16-color group indicator, which makes it easier to identify assigned strobes in more complex lighting setups and streamlines workflow.

Advanced features for demanding photographers

The flash is equipped with a 12-watt LED modeling light with adjustable color temperature ranging from 2800 to 6000 K, making it easier to assess the lighting effect before taking a photo and adjust the light to the surrounding conditions. You also have access to advanced operating modes, such as TTL, Multi, HSS, Freeze, and Color Stable, which provide greater freedom when photographing fast-moving subjects and ensure a stable color temperature in demanding shoots.

Even greater creative possibilities

The GODOX AD300Pro II works with the Godox X 2.4 GHz wireless system and supports fast pairing with the X3 and X3 Pro triggers, while remaining fully compatible with the XPro, X2T, and X1 transmitters. You also have access to a 3.5 mm sync jack and a USB-C port that supports the optional FR433 receiver. The Godox Mount allows you to use a wide range of compact light modifiers, and the optional S3 bracket enables you to mount accessories with a Bowens mount. Additionally, the AD-AB adapter allows you to use adapters compatible with Broncolor, Profoto, and Elinchrom systems, significantly expanding your creative lighting possibilities.

Included in the set

- flash unit
- AC power adapter
- carrying case
- battery protective cover
- flash
- battery
- AD-E2 mount
- glass protective cover
