NEEWER NR01 30 m IP65 RGB Garden String Lights

The NEEWER NR01 string lights let you create stunning outdoor lighting tailored to any occasion. The set consists of two 15-meter strands, each containing 15 independent RGB light points with white light in the range of 2700–6500 K. Each light can shine in a different color, and with a brightness of up to 80 lm per light, you can achieve striking effects. With over 50 dynamic scenes, control via the NEEWER Home app, music synchronization, AI features, voice control, and scheduling, the lighting can be easily customized for both everyday relaxation and outdoor gatherings.

Colors and light exactly the way you want them

RGB IC W technology enables independent control of individual light points, so each LED can be set to a different color. In addition to RGB colors, the string light also offers white light with a color temperature range from 2700 K to 6500 K, so it can create both a warm atmosphere and brighter lighting. Each light point provides up to 80 lm of brightness, and the dimming feature makes it easy

to adjust the light intensity to your current needs.

Over 50 dynamic scenes and custom DIY effects

There are over 50 pre-set lighting scenes available, including modes for everyday use, holidays, various emotions, and nature-inspired themes. The effects library is regularly updated with new options, allowing you to change the look of your lighting on a regular basis. The creative DIY mode also lets you configure colors and effects yourself within the app, providing great freedom for personalization.

Smart AI effects and music synchronization

NEEWER's AI lighting engine allows you to generate lighting effects using voice commands, text, or images. This means you're not limited to preset scenes—you can create your own configurations tailored to specific situations. The controller also features a built-in microphone that recognizes music and sound effects in real time and then synchronizes the lighting with them, allowing colors and effects to change in time with the music.

Convenient Control via App and Voice

The string lights connect via Bluetooth to the NEEWER Home app, which provides access to advanced settings, scenes, and customization features. The product is also compatible with Google Assistant and Alexa, enabling voice control. The timer function lets you schedule the lights to turn on and off automatically at specific times. It supports 2.4 GHz Wi-Fi routers and mobile hotspots, but 5 GHz Wi-Fi networks are not supported.

Ready for Outdoor Use

The lights and the controller meet the IP65 rating requirements, making them resistant to rain and dust and capable of operating reliably at temperatures ranging from -20°C to 50°C. The materials used are shatter-resistant and UV-resistant, which increases the lighting's durability during outdoor use. A lifespan of up to 25,000 hours reduces the need for frequent replacement of light sources. The power supply has an IP44 protection rating and must not be submerged in water.

Quick Installation and Expandability

Each light is equipped with features that make it easy to hang the string lights, and the entire string includes both mounting holes and hooks. This allows for installation without professional tools, and the included cable ties further simplify securing the cable in the desired location. Up to 3 light strings can be connected together, achieving a total length of up to 45 m.

Included in the set

- Light string 15 m x 2
- AC power adapter x 1
- Controller / control module x 1
- Mounting cable ties x 40
- User manual x 1

Manufacturer	NEEWER
Model	NR01
