

ND filter set for DJI Mini 5 Pro (ND8/32/128)

Model: CP.MA.00000880.01

Manufacturer: DJI

EAN: 6937224123168

Product Code: 1343736

R1,712

ND filter set for DJI Mini 5 Pro (ND8/32/128).

Get perfect shots even in very intense light conditions. With a set of three ND filters with varying levels of darkness (ND8, ND32, ND128), you can precisely control exposure, extend shutter speed and record smooth, cinematic footage in any situation. The weight of one accessory is only about 1.12 grams, so it won't weigh down the gimbal or interfere with flight stability.

Three variants of light reduction

The set includes ND8, ND32 and ND128 filters, which work well in a variety of lighting conditions - from moderate sunlight to very bright environments. With these, you can always choose the right filter for the current scene.

Smooth video and longer exposure times

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The filters allow you to record footage with natural motion blur and take photos with long exposure times, such as in timelapse (time-lapse) mode. They help keep ISO low, which translates into clean, clear shots without the risk of overexposure.

Included:

- ND8 filter
- ND32 filter
- ND128 filter

Manufacturer DJI

Manufacturer code CP.MA.00000880.01

Types of filters included ND8, ND32, ND128

Weight of a single filter Approx. 1.12 g
