GODOX Litemons LE200Bi LED Light

The GODOX Litemons LE200Bi is a 220 W Bi-Color COB LED light that combines high performance with a compact, metal design. It offers a light intensity of up to 57,700 lx at a distance of 1 m, smooth color temperature adjustment from 2,800 to 6,500 K, and stepless brightness control in the range of 0–100%. High CRI 98+ and TLCI 98+ ratings help preserve natural skin tones and accurately reproduce product colors, making the light ideal for video recording, live streaming, interviews, and commercial photography.

Powerful Light and Flexible Color Temperature Control

The 2,800–6,500 K range allows for a smooth transition from warm, incandescent-like light to cooler daylight. Brightness can be adjusted continuously from 0 to 100%, making it easy to precisely tailor

the lighting intensity to a specific scene. With an illuminance of up to 57,700 lx at 1 m, the LE200Bi provides ample light for both simple shoots and more demanding studio productions.

Natural Colors

CRI 98+ and TLCI 98+ support precise color reproduction, which is important when photographing products, fabrics, or filming faces. Colors retain their natural appearance, and the smooth transition between warmer and cooler light temperatures allows you to change the mood of the scene without sacrificing color accuracy. This makes it easier to achieve a consistent look right from the recording stage.

11 FX Effects for Creative Scenes

The LE200Bi offers 11 built-in lighting effects, including Flash, Lightning, Cloudy, Broken Bulb, TV, Candle, Fire, Fireworks, Welding, and SOS. The speed of the effects can be adjusted, allowing you to tailor their progression to the nature of your recording. This enables you to create more dynamic scenes during film production, broadcasts, and content creation without the need for additional equipment.

Quiet cooling and a sturdy metal housing

The built-in fan operates at a noise level below 25 dB, making the light suitable for productions where audio is being recorded simultaneously, such as interviews or live broadcasts. The metal construction enhances durability during daily use, while remaining compact enough to conveniently mount the light on a tripod or boom arm.

App Control and Bowens Mount

The light's settings can be adjusted using a dial on the rear of the housing or wirelessly via the Godox Light app over Bluetooth. The integrated Bowens mount allows you to use compatible light-shaping accessories, such as softboxes or Fresnel lenses. This makes it easy to adapt the LE200Bi to various lighting setups and studio applications.

Included in the set
