Computer case DarkFlash F1 +6 Fans (Black)

Model: F1 ATX Black +6F

Manufacturer: DARKFLASH

EAN: 4711747340156

Product Code: 1394794

R3,327

DarkFlash F1 Computer Case + 6 Fans (Black)

The DarkFlash F1 is a spacious ATX case that combines a striking design with extensive cooling capabilities and great flexibility in component configuration. It supports ATX, M-ATX, and ITX motherboards, graphics cards up to 415 mm in length, and CPU coolers up to 180 mm in height. Up to 9 fans can be installed inside, and the kit includes 6 fans, making it easier to ensure strong airflow right from the start of your build. The case also offers space for a water-cooling system up to 360 mm in length and 7 PCIe slots, providing extensive options for building a high-performance system.

Raised Base for Improved Airflow

A distinctive feature of the DarkFlash F1 is its raised base design, which allows air to be drawn in from the bottom and sides of the case. Multidirectional airflow helps deliver cool air more effectively to the internal components, and numerous ventilation openings further aid in heat dissipation. The position of the side fan mounts has also been adjusted—they are now angled an additional 8° toward

the graphics card, allowing the airflow to be directed closer to the GPU.

Up to 9 fans and a 360 mm liquid cooling system

The extensive cooling system allows you to tailor the configuration to the components used. Three 120 mm fans or two 140 mm fans can be mounted on top, two 120 mm fans on the side, three 120 mm fans on the bottom, and one 120 mm or 140 mm fan at the rear. There is also an additional side fan slot behind the motherboard, which helps increase airflow. A 360/240/120 mm water cooling system can be installed at the top of the case.

Showcase your graphics card however you like

The removable PCIe slot module allows you to switch the graphics card’s mounting orientation from horizontal to vertical. This lets you customize the interior layout to suit your configuration and how you want to display your components. Additionally, the DarkFlash F1 features a graphics card bracket that provides extra support and helps keep the card stable once installed.

Space you can use however you like

The raised base not only serves a ventilation function but can also be used as a display platform. You can also use it to place decorations or create your own arrangement. As a result, the case allows you to combine a high-performance computer with a custom visual design.

More Convenient Assembly and Easy Access to the Interior

The four case panels can be easily removed, which simplifies computer assembly, future modifications, and cleaning the interior. The side panels feature a quick-release system, so accessing components doesn’t require time-consuming disassembly. It also includes a removable, easy-to-clean dust filter that helps reduce dust buildup inside the case.

Wide Compatibility with Components

The DarkFlash F1 supports standard ATX, M-ATX, and ITX motherboards, as well as back-connect ATX motherboards with rear-mounted connectors, which helps minimize the number of visible cables.

The case can accommodate a graphics card up to 415 mm long, a CPU cooler up to 180 mm tall, and an ATX power supply up to 200 mm long. The removable drive tray allows you to install up to two 3.5" HDDs or three 2.5" SSDs, giving you flexibility in configuring your storage space.

High-Speed USB-C and a Practical I/O Panel

The I/O panel provides easy access to the most important interfaces. It features two USB 3.0 ports and a USB Type-C port offering data transfer speeds of up to 10 Gb/s, making it easy to connect compatible devices and quickly transfer files. The panel also includes an HD Audio jack and Power, Reset, and LED Switch buttons.

Included

- DarkFlash F1 computer case x1
- Fans x6

Manufacturer	Darkflash
Model	F1
Case Type	Midi Tower
Side Panel	Tempered glass
Motherboard Standard	ATX, microATX, ITX
Power Supply Standard	ATX
Internal Drive Bays	3.5" HDD x2 / 2.5" SSD x3
Expansion Card Slots	7; supports horizontal or vertical graphics card installation
Max Power Supply Length	200 mm
Max Graphics Card Length	415 mm
Max CPU Cooler Height	180 mm
Max Number of Fans	9

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. Fan mounting options	Rear: 1x 120 mm fan or 1x 140 mm fan; Top: 3x 120 mm fans or 2x 140 mm fans; Side: 2x 120 mm fans; Bottom: 3x 120 mm fans
Water cooling mounting options	Top: 120/360/240 mm water cooling
Number of installed fans	6
Fan type	ARGB
Buttons and controls	Power, Reset, LED Switch
Ports	2x USB 3.0, 1x USB-C, HD Audio
Material	0.8 mm SPCC
Color	black
Height	464 mm
Width	240 mm
Depth	452 mm
