bug flies by or trees sway in the wind. Only capture motion that matters, as it happens.

Glass-Break Detection

Glass-Break detection adds a new line of defense to your home surveillance.
Intrusion is a serious threat to your home and loved ones. Receive alerts when the sound of glass breaking is detected near the perimeter.

More Than Just Surveillance

The DCS-8350LH does more than just keep a watchful eye. It can also alert you when a carbon monoxide or smoke alarm has been triggered.

Hear and Be Heard

With a built-in microphone and speaker, you can make your presence felt even when you’re not around. Hear live audio from your camera’s live view and speak into your mobile device to broadcast audio live to the scene to let whoever you can see know you’re watching, whether they’re meant to be there or not.

ONVIF Compliant for the Prosumer in You

Support for ONVIF Profile T lets you easily record video streams to your ONVIF compliant NVR, VMS or NAS system for centralized viewing or continuous, 24/7 recording. Not only that, but you can also use an ONVIF compliant device to control your camera’s setting without using the mydlink app.

The Future of Wireless Encryption

One of the biggest concerns with IoT devices and Wi-Fi networks is privacy. The DCS-8350LH features the latest WPA3™ encryption. It's the most advanced Wi-Fi Alliance security standard available and begins a new era of wireless encryption, ensuring greater privacy throughout users’ devices and networks.

Your Footage, Your Choice

The DCS-8350LH lets you record snapshots and video clips to the Cloud for anytime access. Play back recordings from the Cloud or download footage to your mobile device from anywhere, anytime. Alternatively, store your footage directly to a microSD card. With support for a whopping 256 GB you can save days-on-end of footage. It also cleverly records over your old footage, leaving you with one less thing to worry about.

Works with the Google Assistant and Alexa

The camera plays nice with the Google Assistant and Alexa. Use voice controls to stream live video from your camera to Amazon Fire TV, Echo Show, Echo Spot or Google Chromecast.

FINALLY. A way to monitor everything you care about (without lifting a finger).

Perfect For

Smarter home monitoring

Catch every important detail of anything that happens in your home with Quad HD definition. AI-based features and sensors will immediately alert you when something out of the ordinary is going on.

A smarter crib cam

AI-based person and sound detection will notify you when the baby is awake. With two-way audio you can reassure your little one that you’re on your way or gently hush them back to sleep when they’re restless.

Check in on senior loved ones

Help to ensure the well-being of your elderly loved ones with two-way communication so you can provide assistance whenever needed. Smoke and C/O alarm sound detection can also alert you so you can make sure your aging loved ones are out of harm’s way.

Keep an eye on furry friends

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. Four-legged rascals can get out of control when you’re not around. With two-way audio, you can let them know you’re still keeping an eye on them or let them know you’ll be home soon when they’re feeling lonely.

Get More Control with mydlink

The mydlink app makes looking after your home easier than ever. Manage, control, and set automations for all your mydlink cameras, smart plugs, and sensors anytime, anywhere.
