R1,958

BOBOVR P4U Battery Relief Strap for Pico 4 Ultra/Ultra Enterprise 10000mAh Battery.

The BOBOVR P4U Battery Relief Strap is an advanced power solution for the PICO 4 Ultra and Ultra Enterprise goggles, providing up to 120% more runtime with a 10,000mAh battery. The innovative magnetic hot-swap battery removal system allows for convenient battery replacement without interrupting your session, and support for 22.5W fast charging ensures spare cells are ready in no time. The built-in charge indicator with lower illumination makes it easy to check the energy level, and the ergonomic design with memory foam and optimized strap provides exceptional wearing comfort. Compatibility with the BD3 docking station enables efficient battery management, making

the BOBOVR P4U an ideal choice for any VR enthusiast.

Long runtime and fast charging

The BOBOVR P4U features a B100 battery system with a total capacity of 10,000 mAh (2 cells of 5,000 mAh each), allowing the PICO 4 Ultra to extend its usage time by up to 120%. Whether you're gaming, watching VR videos or giving professional presentations - now you can enjoy longer sessions without worrying about the device suddenly draining. In addition, thanks to the innovative magnetic battery replacement technology, BOBOVR P4U allows you to change the battery seamlessly without having to turn off the device. With support for 22.5W fast charging, spare batteries are ready to go in no time, allowing continuous gameplay without interruption.

Smart charging status indicator

The BOBOVR P4U is distinguished by its lower charge indicator illumination, which allows you to quickly check the status of the battery during use. Different backlight modes indicate the energy level - a steady light means full charge, flashing means low energy, while no light indicates a fully discharged battery. This intuitive solution provides convenient power management, especially during intensive VR sessions.

More options for your comfort

Exceptional wearing comfort is thanks to an enlarged shape-memorizing foam cushion and an optimized top strap. The ergonomic design distributes weight evenly, minimizing pressure on the head and neck. Plus, when paired with the BD3 docking station, you can charge spare batteries while using the goggles. Fast charging allows the battery to be charged to 80% in just one hour, ensuring you always have energy for your next adventures in the virtual world.

Included

- docking station
- flexible support
- PU cushions
- honeycomb cushions
