Fanttik X10 Ace Tiny mini bike pump

The Fanttik X10 Ace Tiny is a compact electric pump designed for inflating bike tires. It offers a maximum pressure of 120 PSI, accuracy to 0.1 PSI, and fast air refilling. Thanks to its small size and low weight, you can easily take it with you on any trip – whether it's your daily commute or longer road or MTB rides.

Small size, real power

The Fanttik X10 is designed with mobility in mind. It measures just 7.2 × 5.3 × 3 cm and weighs approximately 0.13 kg. It fits easily into a cycling jersey pocket, saddle bag, or water bottle cage. This means you can always have it with you and react immediately when the tire pressure starts to drop.

Fast inflation and accurate pressure

The pump reaches a maximum pressure of 120 PSI, allowing you to comfortably inflate both road and mountain tires. For a 700×25C tire, it can increase the pressure from 80 to 100 PSI in just 22 seconds. This efficiency means shorter stops and a quicker return to the road. The device operates with an accuracy of 0.1 PSI.

Automatic stop and memory settings

Operation is simple and intuitive. Just set the target pressure and the pump will stop automatically when it is reached. What's more, it remembers the last setting, so you don't have to re-enter the same values the next time you use it. This saves time and reduces the risk of mistakes. The model works directly with Presta valves, and with the included hose with Schrader tip and adapter, it can also easily handle other types of valves.

Easy-to-read LED display

The bright, digital LED screen with a dynamic progress bar allows you to monitor pressure changes even in direct sunlight. Switching between PSI/Bar units takes about 1.5 seconds, making it easy to adjust the settings to your preferences. The clear readout translates into greater confidence and safety when pumping.

Greater comfort of use

Compared to traditional pumps, the device reduces vibrations by up to 50%. This makes it more stable and comfortable to hold in your hand, and pumping less tiring. This is especially important during longer trips or in situations where fast and efficient operation is important. The built-in 3.70 Wh battery is charged at 10 W. When fully charged, the pump can inflate up to 8 tires in the 700×25C standard.

Included in the set

- Fanttik X10 Ace mini pump
- Charging cable
