R1,526

A4tech Bloody S87 is a compact tenkeyless mechanical keyboard designed for gaming and focused desktop setups. It delivers a balanced combination of responsive input and space-saving layout, making it suitable for competitive play and everyday typing.

The keyboard features hot-swappable BLMS Red Plus switches that allow easy customization and a rated lifespan of 50 million clicks for extended reliability. Durable PBT keycaps, white backlighting, full n-key rollover, and a dedicated game mode key help maintain consistent performance during intense sessions, while the wired USB connection and 1.8 m cable ensure stable connectivity and placement flexibility. Adjustable feet provide comfortable typing angles to match personal preferences.
