Model: NFG-2244

Manufacturer: GENESIS

EAN: 5901969445596

Product Code: 1410592

R4,956

Genesis Nitro 660 is an ergonomic chair created for gamers who value comfort, durability and functionality. Made of soft, breathable and snag-resistant fabric, it will provide you not only with durability, but also with adequate air circulation, which guarantees comfort even during long hours spent playing your favorite games. Its construction is based on a strong metal frame filled with high-quality deformation-resistant foam, so the chair will take care of your correct posture.

ERGONOMICS AT THE HIGHEST LEVEL

Do you value ergonomics at your desk while working or playing? We do too! The Genesis Nitro 660 chair is equipped with comfortable, ergonomic cushions: headrest and lumbar cushion, made of shape-memorizing foam, which will perfectly fit your body. In addition, the headrest will allow you to adjust its position with a built-in magnet, so that comfort comes first regardless of your height.

ADVANCED CONTROL FUNCTIONS

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

We've made sure that the chair offers a wide range of adjustments, allowing you to adjust its height and backrest tilt to suit your needs. The adjustable 2D armrests allow for up/down and side-to-side adjustment, so you can easily ensure the most comfortable position at your desk.

DURABILITY FOR YEARS

Thanks to its snag-resistant fabric and strong metal base, the chair will remain damage-resistant and completely stable for years to come. In addition, the large CareGlide™ coated casters mean you don't have to worry about damaging your floor as they protect various surfaces from scratches, allowing you to move the chair freely.

ADDITIONAL COMFORT FEATURES

We've already mentioned that the Nitro 660 is equipped with a backrest adjustment mechanism, and it's designed to allow you to relax for a while after intense gameplay thanks to its extra-wide reclining angle. Its modern design and functionality make it an ideal choice for any gamer looking for maximum comfort and support during long hours of gaming sessions without back pain.

PRACTICAL EXTRAS

There is a handy pocket on the back of the backrest where you can easily store your phone, charger or other non-game related accessories, so you can keep your station tidy.
