Freewell Real Locking Variable ND/CPL All Day Filter Kit

The Freewell Real Locking All Day Kit is a filter system designed for filmmakers who need complete control over light and images. It combines a variable gray filter (VND), an ND32 filter and a hood to set the white balance, providing maximum flexibility for shooting and filming. The whole thing is based on a robust locking system that guarantees fast mounting and stability even during dynamic work.

Precise control of light and exposure

The Variable Gray Filter (VND) offers image dimming adjustment from 3 to 10 degrees. This allows you to shoot or film even in very bright light without overexposure - without having to change the shutter speed or aperture. The included ND32 filter allows you to extend the range to a maximum of

10 degrees, which is ideal for long exposures, motion blur, timelapse, or filming with a cinematic fluid effect.

Mechanical locking - stability without magnets

Unlike classic magnetic filters, Freewell used a mechanical locking system that holds the filter rigidly in place. The filter does not rotate on its own and does not fall off, even during intense camera movement or gimbal work. Installation and removal is instant - just press the side latches.

Natural colors without distortion - True Color Optics

The filters are made of True Color grade optical glass, so you'll get neutral, true colors even at strong dimming or strong contrast. This is especially important when working with professional video footage, where consistency of shots matters.

Practical extras for convenient work in the field

The front cap with a 2-snap lock and built-in NFC module gives access to instructions, instructional videos and warranty information when the smartphone is brought close. The rear cap has an integrated gray card that allows you to quickly set the white balance on set, without the need for additional accessories.

Included

- VND3-7/CPL filter
- ND32 filter
- 82mm ring
- front magnetic NFC cap
- rear white balance cover
- filter case
- cleaning cloth
