Share a mouse, keyboard, and a 4K 60Hz HDMI display between a USB-A computer and a USB-C DP Alt Mode computer using this KVM Switch with built-in cables

This Hybrid KVM Switch enables users to switch between a USB Type-A and HDMI-enabled desktop and a USB Type-C (DP Alt-Mode) enabled laptop, to share a keyboard, mouse, audio input/output devices, and a single 4K 60Hz HDMI monitor.

Hassle-Free Setup

The KVM switch is bus powered and features built-in HDMI, USB-A, USB-C, and 3.5mm Audio Input/Output cables. This ensures compatibility and performance between the KVM switch, monitors, and peripherals - without the need to select and purchase the cables required for those connections.

Compatibility

The 2-port KVM switch is compatible with all operating systems, including Windows, macOS, ChromeOS, and Linux. The KVM works with all hardware platforms including Intel, AMD, and Apple M1/M2. The USB-C host port works with USB-C, USB4, Thunderbolt 3, and Thunderbolt 4 laptops. If the desktop does not have a 4-position 3.5mm port the included 3.5mm Headset Adapter ensures compatibility out of the box.

Intuitive Control

The KVM switch offers two options to switch between hosts - a remote push button or hotkey commands. The remote push button includes a 1.5m cable for optimal placement in the setup. Independent audio switching can be achieved through the software, ensuring uninterrupted audio when switching between host devices.

Enhance Productivity and Device Management with the StarTech.com Connectivity Tools Application
