Add three USB Type-A ports and one USB Type-C port to your computer, using this mountable USB 3.2 Gen 1 (5Gbps) hub

This 4-port USB 3.2 Gen 1 hub turns your laptop or desktop USB-A port into two standard USB-A ports, one USB-A fast-charge port and one USB-C™ port. You can also extend the range of your USB devices by using this hub as a mid-point repeater.

Connect more devices quickly and easily

The 4-port hub is designed for easy port access, when the hub is mounted or sitting on your desk. The hub ports are spaced with enough room between them to easily plug or unplug your USB devices, without having to disconnect other devices from neighboring ports.

With extra USB 3.2 Gen 1 ports, you can increase productivity and connect more devices to your computer, or simply avoid the hassle of swapping connected devices on your port-limited laptop. The USB-C port is ideal for connecting new USB-C devices, like an external USB-C drive, to a traditional USB-A port on your computer.

It's perfect for IT professionals or anyone who needs to plug and unplug their devices regularly.

Enjoy mounted or desktop convenience

This hub is perfect the perfect accessory for a laptop or desktop workstation, with a rugged metal housing that can withstand the wear and tear of daily use.

With the included wall-mount bracket, you can attach the hub to a surface such as a desktop or wall, to better suit your needs.

Charge-and-sync your mobile devices

With the available fast-charge port, the hub helps to ensure that your tablet or smartphone are charged and ready to use when you need them. You can also sync and access your device while it is charging. The USB-A charge port supports USB Battery Charging Specification 1.2 and delivers up to 2.4 amps of power, so you can charge your mobile device faster than traditional USB ports allow.
