Genesis Neon 213 RGB czarne

Model: NSG-2306

Manufacturer: GENESIS

EAN: 5901969449235

Product Code: 1416765

R1,079

The Neon 213 headphones are an excellent choice for gamers who appreciate comfort, style and good sound quality at an affordable price. Made of modern materials and equipped with striking RGB backlighting, they will perfectly complement any gaming setup. Built-in microphone and intuitive operation make this model successfully meet the expectations of even demanding users.

First, convenience, second, durability

When designing the Neon 213 headphones, we focused on a combination of comfort, style and quality. Thanks to the use of textile material and eco-leather in the pads, they provide not only higher comfort, but also greater durability compared to competing solutions. The hybrid design proves to be especially important during long gaming sessions - especially on warmer days, when thermal comfort of the ears becomes particularly important.

Vibrant backlighting colors

The stylish RGB backlighting of the Neon 213 headphones not only enhances their modern design, but also ensures consistency with other PC peripherals equipped with such a solution, creating a unified and impressive gaming setup.

Sound that inspires you to win

The Neon 213 headphones also provide good quality sound that takes you right into the middle of the action. Thanks to the bass and treble boost, you can enjoy better distinction of details - from explosions to enemy footsteps - every sound is clearly audible. Such tuned sound is a real advantage, especially in online games.

Controls always at hand

Convenient controls located on the ear cup keep the most important functions close at hand. So you can easily adjust the volume or mute the microphone, without having to reach for the remote control on the cable. You are assured that nothing will interfere with intense gameplay, allowing you to fully focus on the action.

Make yourself heard

At GENESIS, we know how important it is to communicate with your team, which is why we equipped the Neon 213 headphones with a microphone to ensure good sound quality during any raid, clutch or gank. Thanks to the wide frequency response from 100 to 16,000 Hz, your voice will be clear and free of distortion - even in noisy environments. This is an ideal choice for gamers who value reliable communication during gameplay.
