Mount a TV to a wall using this space-saving, low-profile mount with premium finish

Create a TV mounting solution with this articulating wall mount that supports up to 100-inch and 187.4lb (85kg) televisions. Use in conference rooms, customer-facing applications, and collaborative spaces where durability, precision, and presentation matter.

Heavy-Duty Articulating Television Mount

The mount collapses to just 4.1in (10.5cm) from the wall and extends to 21.6 in (55 cm) for easy access behind the TV. Dual-stud mounting (16in spacing) and dual-arm design ensure safe mounting and smooth motion when positioning your display. For perfect screen positioning, you can tilt (+2°/-12°) and swivel (+/-60°) for post-install adjustments to achieve the best viewing angle. The flat screen bracket is TAA-compliant to meet procurement requirements.

Versatile Mounting with a Premium Finish

This VESA-compatible wall mount supports patterns up to 800x500mm and includes hardware, spacers, and a wall template for clean installation. It secures to wood studs, brick, or concrete surfaces, offering flexibility across environments. Integrated cable channels keep wires organized, while the silver steel and aluminum frame with decorative covers creates a refined, professional look from any angle.
