Secure a laptop, docking station, or other peripherals with this 3-in-1 master keyed cable lock

The 25-Pack Universal Laptop Lock is a versatile solution compatible with Noble Wedge®; K-Slot (T-Bar), or Nano, providing flexibility and convenience.

Adaptable Security

A unique on-the-fly lock tip mechanism enables quickly adapting the lock tip to fit different security slot types. Simply rotate the lock selection dial to change the shape of the lock tip to match the security slot, without requiring additional tools or carry separate lock tips. The cut-resistant steel security cable is 6.6ft (2m) long providing reach and durability.

Master Keyed Lock

All 25 locks are master keyed and include a pair of unique keys per lock. This enables streamlined security management of multiple locks for IT administrators. The lock can withstand a pull force of 201lb (91.2kg) for K-slot, 217.8lb (98.8kg) for Nano, and 134.4lb (61.2kg) for Noble Wedge®; ensuring the computer or other devices remains safe from theft.

Note:

- The Master Key is not included but can be requested with proof of purchase.
- The pull force values mentioned may vary if the security slots do not comply with the design standards specified by their respective manufacturers.

Widely Compatible

The versatile bulk-pack security lock is not limited to laptops or notebooks only. Expand the utility of this lock to secure other devices such as docking stations, monitors, printers, SFF computers, projectors, oscilloscopes, or other office and lab equipment. The lock is future-proof and is compatible with old and new computers and peripherals from various brands, including HP, Dell, Microsoft, and more. Spacers are included to protect the device from scuffing or denting the lock slot while ensuring a better fit to the device.

Full-Motion Lock Design

The diameter of the lock head is 0.5in (14mm) and features a ball joint design that allows for 360° rotation and 90° pivot of the lock head. This flexibility reduces coiling and minimizes strain on the notebook slot, enhancing durability and usability.
