LEPRO O1 2300 lm RGB Floor Lamp

An evening of relaxation, a movie night, a house party, or perhaps some focused work time? The LEPRO O1 2300 lm RGB floor lamp lets you create exactly the atmosphere you need in just a few moments. Thanks to advanced AI features and extensive customization options, lighting becomes more than just an interior accessory—it responds to your needs, mood, and lifestyle. With a brightness of up to 2300 lumens, the lamp works perfectly both as mood lighting for the living room and as a full-fledged light source for work or reading. Plus, music synchronization, voice control, and the ability to create your own effects give every space a unique character.

Your personal lighting designer

LEPRO O1 uses LightGPM 4 technology, which acts like a smart lighting designer. Simply tell the Lepro app what effect you want to achieve or what mood suits you, and the system will suggest the best-suited lighting scenes on its own. The algorithm is based on professional knowledge of colors

and lighting design, and over time it learns your preferences, tailoring subsequent suggestions with increasing accuracy. This solution is designed for people who want to quickly achieve a great effect without having to manually adjust every parameter.

Voice control without taking out your phone

Forget about scrolling through preset lists and laboriously configuring scenes. Advanced voice control lets you tell the app what you want, and the lamp will adapt to your needs. Want to create a party atmosphere, give your interior a festive feel, or match the lighting to your favorite movie or game? The LEPRO O1 will do it in seconds. Everything is controlled via the Lepro app, making lamp control fast, convenient, and intuitive. Please note that this model is not compatible with the Lepro LampUX or Smart Life apps.

Take a photo and create the perfect atmosphere

It's not always easy to describe your dream interior atmosphere in words. That's why LightGPM can analyze images and create customized lighting effects based on them. You can take a photo of your room so the app can suggest lighting that perfectly complements the space, or upload a movie poster, graphic, or game character to instantly give the interior a specific color theme. This is an incredibly creative feature that lets you personalize your space in a whole new way.

Dynamic effects synchronized with music

LightBeats Music Sync technology transforms an ordinary room into a dynamic entertainment zone. The light reacts to the rhythm of the music, pulsing and changing colors in time with the beats. This effect works great during parties, get-togethers with friends, or while listening to music in the evening, creating a more immersive and energetic atmosphere. Thanks to smooth color transitions and a wide RGB palette, every room takes on a new character.

Extensive effect customization

If you prefer to create your own scenes, the LEPRO O1 offers extensive configuration options. Each effect can be edited and tailored to your preferences—from color combinations and brightness to the dynamics and speed of animations. You don't have to start from scratch, as AI-generated designs

can serve as a foundation for further modifications. Ready-made compositions can be saved and shared with the Lepro app community, which further encourages experimentation with light.

DIY Mode - light tailored to your style

DIY Mode lets you change not only the colors but also the character and form of lighting effects to best match your interior design, occasion, or current mood. The ability to save your favorite settings with a single click means returning to your favorite scenes takes literally a moment. LEPRO O1 offers a highly interactive experience and gives you a sense of complete control over the atmosphere in the room. What’s more, LEPRO O1 is equipped with timer and circadian rhythm functions that help create more comfortable conditions for sleep and daily life. In the evening, the light gradually dims, helping to calm the body before sleep, and in the morning, it gently brightens the room, mimicking a natural sunrise.

2300 lm brightness for relaxation and work

The lamp offers an impressive brightness of 2300 lumens, making it easy to illuminate a living room, bedroom, or home office. The rich RGB color palette allows you to create striking decorative lighting; warm light promotes rest and evening relaxation, while cool tones help increase concentration while working or studying. The LEPRO O1 works well both as a designer element of your decor and as a practical source of everyday lighting. Its Energy Class E rating ensures reasonable energy consumption, combining functionality with cost-effectiveness.
