Mount and securely store AV components behind a wall-mounted TV using this slide-out locking panel

Store cable boxes, media players, and other A/V devices neatly behind the TV to create a cleaner, more professional wall setup.

Easy Access for Updates and Service

The slide-out panel makes it faster and easier to reach devices and cabling during setup, maintenance, or troubleshooting. When the work is done, simply slide it back in to maintain a tidy finished look.

Flexible Fit for Different Devices

Multiple mounting points help support a wider range of device sizes and shapes, and allow for different device orientations to support cleaner cable management. The slim 0.9in (2.3cm) profile also helps maximize the rear space available behind the display for taller equipment.

Secure Mounting Across Installations

The durable steel panel supports up to 22lb (10kg) and includes hook-and-loop and cable ties to help keep equipment secure and organized. It can be mounted to wood-stud walls, concrete walls, or wall-mounted aluminum extrusions for added installation flexibility.
