Ecovacs Deebot T80 Omni Black

Model: Deebot T80 Omni

Manufacturer: ECOVACS

EAN: 6970135036271

Product Code: 1421417

R11,304

All-New Robotic Vacuum Cleaner DEEBOT T80 OMNI with TruEdge, ZeroTangle and AI Instant Re-Mop, Ultra-Slim Design

An unmatched mopping performance with the cutting edge OZMO ROLLER Instant Self-Washing Mopping Technology

The DEEBOT T80 OMNI features the OZMO ROLLER Mopping Technology to deliver a more powerful mopping experience, effectively scrubbing and removing stains from the floor, with a mopping pressure intensity of 3,700Pa, which is more than 16*[1] times the pressure of traditional dual-plate mopping and vibrating flat mopping. The clean water is delivered back to the mop to keep the mop renewed after the wastewater is scraped off. With up to 200 rpm rolling speed, this equates to 200 high-speed scrubbing and rinsing actions per minute, effectively preventing streaks and cross-contamination. With a smaller contact area, the mop contains more concentrated pressure to achieve a significant cleaning effect on stains.

The upgraded TruEdge 2.0 brings perfect edge cleaning

Upgraded TruEdge 2.0 allows roller mop to extend dynamically during edge cleaning to maximize the coverage at edges and corners. Furthermore, combined with an enhanced sensory algorithm and brand new TruEdge 3D Edge Sensor, the continuously variable roller mop can adapt with different types of edges and turns to precisely avoid collision while remaining close to edges. In addition, the side brush is constantly extended on a solid structure to reach the blind spots on corners that are much more difficult to achieve 99% coverage*².

18,000Pa Suction Power for Unrivaled Cleanliness

Powered by an ultra high-speed fan, the DEEBOT T80 OMNI delivers 18,000 Pa of suction power to achieve breakthrough sweeping and suction performance.

Revolutionary ZeroTangle 3.0 System Redefines Tangle-Free Cleaning Experience

The DEEBOT T80 OMNI introduces the newly enhanced ZeroTangle 3.0 system, featuring an upgraded ARClean Anti-Tangle Side Brush and advanced Triple-V Anti-Tangle Structure. The golden spiral design, combined with a single-prong dual-cluster and inward-curved bristles, effectively prevents hair tangling while enhancing the side brush's cleaning performance. Additionally, the 45° V-shaped bristle configuration prevents hair from becoming trapped on the main brush, while the spiral main brush and comb teeth ensure smooth untangling. Users can enjoy efficient suction, easy maintenance, and immaculate floors with the DEEBOT T80 OMNI.

Extra Special Care for Your Carpets

The DEEBOT T80 OMNI excels in carpet cleaning with its "Carpet First" function, preventing wetting by vacuuming carpets first with a dry mop. Its TruEdge 3D Edge Sensor ensures precise navigation along edges while automatic recognition of carpet types enables seamless mode switching, such as "Vacuum Only", "No Entry", "Pass Through Only" and "As On Floor" as is chosen, handling various carpets with professional strategies and settings.

AIVI 3D 3.0 Omni-Approach Technology Allows DEEBOT to Clean the Edges of Everything

The AIVI 3D 3.0 Omni-Approach Technology, powered by the VLM model, uses deep learning for precise object recognition and rapid contour extraction. Its structured light and TruEdg3D Edge Sensor ensure close obstacle cleaning, while real-time path planning instantly reacts to sudden environmental changes.

Enhanced AI Instant Re-Mop 2.0 Effortlessly Eliminates Tough Stains in Seconds

The upgraded AI Instant Re-Mop 2.0 system intelligently detects and categorizes stains based on their severity, providing a more refined cleaning experience. For light stains, it performs rapid re-mopping without interruption, utilizing instant self-washing to ensure continuous cleaning without the need for station rinsing. For heavy stains, it activates a deep-cleaning protocol, specifically targeting and repeatedly mopping these areas to ensure thorough removal of stubborn dirt and stains.

Real-time Path Planning, react quickly to the change of surroundings

With the VLM model and structured light's collaborative algorithm, the DEEBOT dynamically avoids obstacles in real time, instantly adjusting its path to sudden changes like people and pets moving in front or shifts in furniture.

Temperature-Controlled Mop Washing 2.0 Ensures Impeccable Roller Mop Cleaning with Precision

The 40-75°C temperature-controlled mop washing allows for automatic adjustment of mop washing temperature according to the room type and dirtiness level, while the rounds of washing can be tailored accordingly. This ensures the maximization of mop washing effects after cleaning any kinds of dirt, achieving a pristine result without any excessive cleaning.

45°C Hot Air Drying System Keeps Mop Fresh and Odor-free!

The 45°C Hot Air Drying system incorporates a 360° rolling drying mechanism for the roller, with hot air precisely directed and concentrated on one side. Within just two hours, this system ensures complete drying of the mop, effectively preventing the development of odors.

150-Day Maintenance-Free Mop Washing Tray

The 150-day maintenance-free mop washing tray will keep users' hands free, only requiring 1-2 disassemblies for cleaning per year.

*[1]"16 times" refers to the DEEBOT T80 OMNI's OZMO ROLLER Mopping exerting 16 times the cleaning pressure compared to dual-plate mopping. The data is from the ECOVACS laboratory. Specific results are subject to actual home use.
*[2]“99% Cleaning Coverage” refers to that the sweeping function of ECOVACS DEEBOT T80 OMNI products can achieve 99% sweeping coverage at outer corners and inner corners in the experimental scenario. The data is from the ECOVACS laboratory. Specific results are subject to actual home use.
