IRDM PRO DDR4 DEEP BLACK

IRDM PRO DDR4 Deep Black memory modules have been created with gamers and enthusiasts in mind. The modules are built with selected memories and an 8-layer PCB, all encased in stylish, heat dissipating heatsinks, available in Deep Black.

IRDM PRO Deep Black impresses with a matte, uniform black heatsink, in line with current trends. It perfectly suits custom PCs that focus on cleanliness and aesthetics. The heatsink features the brand's minimalist logo in semi-matte black. The shades of black add character to the modules, which is sure to appeal to gamers and enthusiasts who

prefer stylish solutions.

Enter the game

IRDM PRO DDR4 modules are available in 8 GB and 16 GB capacities in Single Channel and in 16 GB and 32 GB capacities in Dual Channel mode. The frequency of 3600 MHz provides the speed and reliability that gamers, professionals and overclockers expect.

Highest quality = lifetime warranty

All IRDM PRO memory modules are manufactured in Poland using carefully selected components. Each production stage undergoes multi-stage testing to ensure the highest quality. The Polish manufacturer provides a lifetime guarantee, which is proof of the highest quality of the product.

Minimalistic design

IRDM PRO modules have low-profile heatsinks that effectively dissipate heat, guaranteeing stable computer operation. The heatsinks for IRDM PRO series modules are available in four unique colour versions: Pitch Black with a dominant matte black coating, Hollow White and Crimson White distinguished by the white colour of the heatsink and PCB, and Deep Black (all-black design).
