MOUSE USB OPTICAL WRL X2A/ES SIZE2 BLACK PX2AES21 PULSAR

Model: PX2AES21

Manufacturer: PULSAR

EAN: 8809773553926

Product Code: 1424595

R3,394

PULSAR X2A eS Medium **(**PX2AES21)

Precision Redefined with OLED Customization

The X2A eS mouse redefines gaming with cutting-edge features, including an OLED display for real-time gaming information, seamless settings adjustment, and an impressive 4K wireless/8K wired polling rate. With a detachable side button and cover, this ambidextrous mouse caters to both left and right-handed gamers, offering a personalized experience. The Fast and Double Click Free Optical Switch eliminates double-click issues, and equipped with the Pulsar Blue Encoder, aerospace-grade aluminum alloy wheel, and flagship PAW3395 Sensor, the X2A eS delivers unparalleled

responsiveness, seamlessly blending style and precision for an enhanced gaming experience.

MAXIMIZE SPEED AND PRECISION

Experience gaming at its peak with the X2A eS Gaming Mouse featuring a groundbreaking 4K wireless dongle. The advanced 4K dongle ensures seamless responsiveness, providing a lag-free connection for lightning-fast reactions and unparalleled accuracy.

SWITCHING BETWEEN 4K WIRELESS AND 8K WIRED MODES

4K-ready in wireless for crisp graphics and responsiveness. Switch to the 8K wired mode for unparalleled detail and precision. Enjoy the benefits of 4K polling for enhanced clarity and 8K polling for ultimate gaming precision.

DETACHABLE MAGNETIC BUTTONS

Detachable magnetic buttons and button covers for customizable gaming experience.

OLED DISPLAY, DRIVER FREE CONTROL

Explore advanced customization with the eS Gaming Mouse Series featuring an integrated OLED display. Easily monitor battery levels and adjust key settings, such as LOD, debounce time, motion sync, polling rate, and DPI, using dedicated mouse buttons – all without the requirement for external drivers.

OPTIMIZE GAMING WITH PULSAR BLUE ENCODER & ALLOY WHEEL

Discover durability and style with our gaming mouse's Aerospace grade aluminum alloy wheel. The sleek design ensures precision and longevity, providing a robust scrolling experience. The Pulsar Blue encoder offers a delightful tactile rotation sensation, operating quietly and smoothly, with a built-in dust-proof mechanism for enhanced reliability.

SPEED OF LIGHT, OPTICAL SWITCH

Optical switches avoid double-clicking issues because they don't have physical contacts prone to wear and bouncing, unlike mechanical switches. They use light-based detection, making unintended double clicks less likely. They are also fast due to this light-based detection mechanism, offering quick and precise responses. In addition, the switches are pre-sorted into 3 stages to provide you with light-click switches.

THE MOST EFFICIENT AND POWERFUL SENSOR

Introducing the X2A eS Gaming Mouse, equipped with PixArt's cutting-edge PAW3395 sensor, the latest flagship in sensor technology. Boasting remarkable capabilities such as a high-performance range of 26000 dpi, 650 IPS, and 50G acceleration, it is meticulously optimized to deliver an unparalleled competitive gaming experience. The device's main chip processor has undergone a significant upgrade to incorporate the industry-leading Nordic MCU, ensuring exceptional power efficiency and precise, rapid processing. This enhancement not only extends the battery life but also provides highly accurate battery readings, guaranteeing worry-free extended gaming sessions.

CUSTOM DPI MODE

400 - 800 - 1600 -3200 - 6400 - 12800 - Custom DPI mode (400-6400 DPI)

Experience perfect gaming with custom DPI modes on your eS Mouse.

Use the scroll wheel to quickly and easily adjust DPI settings, finding your ideal sensitivity. The custom DPI mode allows you to set your DPI in increments of 50, giving you precise control over your gaming experience.

PIXART MOTION SYNC TECHNOLOGY

This latest flagship sensor from Pixart has the highest specs in the market with extreme precision of 99.6% resolution accuracy. However, this does not mean the sensor is more accurate tracking. To make your sensor more accurate tracking, the Motion-Sync Technology is built into the sensor. Your PC extracts information from another sensor at a rate that does not perfectly match the signal the mouse sends out when it extracts information from another sensor. The Motion-Sync Technology synchronizes its signals intelligently at the exact intervals your PC extracts information. This allows the tracking to be very accurate. However, this may cause some motion delay (less than 1 ms) that is not noticeable during in-game play.

4K POLLING READY

Experience unparalleled cursor precision with the Pulsar 4K Wireless Dongle, ensuring smooth and responsive performance on high refresh rate monitors. The elevated polling rate guarantees a seamless data flow, minimizing delay compared to standard rates. The package includes the 4K Dongle, and in wired mode, the mouse supports 8K, offering a competitive edge with superior resolution and precision for gaming on high-resolution monitors. Elevate your gameplay with the pinnacle of responsiveness.

- Designed for Competitive eSports
- OLED Display on the bottom of the mouse
- Driverless - Change the settings without the software
- Super high polling rate - 4K Wireless / 8K Wired
- Ambidextrous for both left and right hand
- Side button cover (4pcs) Included
- Symmetrical Shape
- Recommended for Claw / Fingertip Grip
- Fast and Double Click Free OPTICAL SWITCH
- Pulsar Blue Encoder
- Aerospace-grade aluminum alloy wheel
- Latest Flagship PAW3395 Sensor
- balanced weight distribution
- Superflex Paracord Cable
- 500mA battery for 70-100 hours of usage
- Super rigid body structure

Summary: PULSAR X2A eS Medium Gaming Mouse. Form factor: Ambidextrous. Movement detection technology: Optical, Device interface: RF Wireless + USB Type-C, Movement resolution: 26000 DPI, Buttons type: Pressed buttons, Scroll type: Wheel, Acceleration (max): 50 G. Power source: Batteries/Cable. Product colour: Black | Vendor Homepage: https://www.pulsar.gg/products/x2a-es-gaming-mouse?_pos=1&_sid=9ad546e62&_ss=r&variant=44514263367934 | Connectivity technology: Wired & Wireless | Device interface: RF Wireless + USB Type-C | Purpose: Gaming | Movement detection technology: Optical | Movement resolution: 26000 | Buttons type: Pressed buttons | Scroll type: Wheel | Number of scroll wheels: 1 | Scrolling directions: Vertical | Button functions: Back/DPI switch/Forward/Polling rate switch | Buttons durability (million clicks): 90 | Mouse tracking speed: 650 | Customizable movement resolution: Yes | Acceleration (max): 50 | Polling rate: 4000,8000 | Sensor type: PAW3395 | Form factor: Ambidextrous | Vertical design: No | Product colour: Black | Surface coloration: Monochromatic | Material: Acrylonitrile butadiene styrene (ABS) | Built-in display: Yes | Display type: OLED | On/off switch: Yes | Plug and Play: Yes | Power source: Batteries/Cable | Rechargeable: Yes | Battery type: Built-in battery | Battery technology: Lithium-Ion (Li-Ion) | Battery capacity: 500 | Battery life (max): 100 | USB Type-C charging port: Yes | Width: 63 | Depth: 120.4 | Height: 38 | Weight: 69 | Quantity per pack: 1 | Cables included: USB Type-A to USB Type-C ¦ AC adapter included: No ¦ Receiver included: Yes ¦ Compliance certificates: CE/EAC/Federal
