Gigabit PoE router for MicroPoP applications.

Ideal for wireless ISP (WISP) deployments, the UISP™ Router is a fanless PoE router featuring (8) GbE RJ45 ports and (1) 1G SFP port for an additional fiber uplink option. The UISP Router provides a cost-effective routing solution for WISPs looking to quickly and inexpensively deliver Gigabit wireless speeds to their customers. With its hefty 110W total PoE supply, the UISP Router delivers substantial power to every radio in your service network. The UISP Router is managed with the UISP application, a centralized platform where you can monitor and manage all of your UISP devices.

Works with the Ubiquiti Internet Service Provider (UISP™) Application

- Centrally manage your networks and customers with ease
- Organize your subscription plans, setup billing and invoicing, and grow your customer base
- View your network's topology, advanced analytics, and more
