R2,126

Small interface, big flexibility

DockingStations not only offer users a way to quickly change from one working environment to another via a single cable, they can also add additional functionality and capabilities to notebooks that are increasingly favoring design over function.

Appearance and performance

This DockingStation perfectly combines high-quality appearance and efficient technology with a very compact size. The premium aluminium enclosure looks good and offers high comfort while using. This solution is suited for any location such as private or office areas.

Always informed!

Three video interfaces are available, and enable you to connect HDMI® and DP™ devices simultaneously.
