Deter the theft of a laptop, docking station, or other Nano-slot compatible peripheral, using this security cable lock

The Nano-Slot Laptop Lock is an anti-theft cut-resistant cable lock designed to deter the theft of laptops and other ultra-slim notebooks. The laptop lock features a 6.6ft (2m) cut-resistant cable with a PVC coating, making it a durable and reliable solution for securing laptops. The lock body features zinc-alloy plating, which prevents corrosion and wear. The compact design of this lock is perfect for ultra-slim notebooks, 2-in-1 laptops, tablets, and many other devices that feature a Nano-Slot.

Full-Motion Lock Design

The diameter of the lock head is 0.4in (12.5mm), with an off-center lock tip that enables a ultrabook or slim laptops to lay flat when the lock is attached. Additionally, the lock head features both pivot and ball joints, allowing the lock to pivot 90° and rotate a full 360°.

Keyed Anti-Theft Laptop Lock

Keyed anti-theft laptop lock has a push-to-lock system that allows for quick lock-unlock without the need to remember sequential numbers. It also features a spacer near the lock tip that protects the device from scuffing or denting the laptop's lock slot. The lock includes a set of two zinc alloy keys.

Flexible Installation

The 6.5ft, 4.4mm cut-resistant steel wire can be routed through a grommet hole or attached to the leg of a table. It is the ideal security lock for tradeshows, POS, kiosks, office security, and product exhibits. Enhance the convenience and security of this product, using LTANCHOR or LTANCHORL (sold separately), to secure a device to a table or desk. The multitude of installation options ensures this lock will fit any application.
