(156G-PRIVACY-SCREEN)

Model: 156G-PRIVACY-SCREEN

Manufacturer: STARTECH

EAN: 065030901987

Product Code: 1432380

R1,747

Prevent visual eavesdropping by limiting the viewing angle of your laptop screen

This Laptop Privacy Screen features a universal design compatible with 15.6-inch laptop screens with a 16:9 aspect ratio display. Gold Privacy Filters have a reflective surface that instantly transitions from a clear view to a mirror effect outside of the intended viewing angle, significantly improving visual privacy when working in an office or public environment.

Prevent Visual Eavesdropping

The gold security filter is a convenient solution that features a quick shift to a mirror-like effect to protect confidential data from unwanted viewers while maintaining a clear view of 60 degrees (+/- 30 degrees from the center) for the user.

Reversible Filter

The privacy filter's removable and reversible design allows users to effortlessly switch between a glossy gold side for maximum privacy and an anti-glare matte side for environments prone to glare.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The matte side provides additional screen protection with a scratch- and fingerprint-resistant coating.

Hassle-free Installation

The universal design won't interfere with top-mounted webcams, sensors, or when closing the lid. The privacy filter can be installed in two different ways. Affix the privacy shield to bezel-less displays using the transparent and residue-free adhesive strips. Alternatively, use the slide mount tabs to install the privacy screen on displays with bezels. The latter is recommended when frequent reversal or removal is required.

Blue Light Reduction

Reduce eye strain and improve visual comfort with this blue light-reducing privacy shield. It blocks 40% - 51% of the blue light emitted from the display in the 380nm - 480nm wavelength range. Digital eye strain can lead to symptoms like headaches, dry eyes, and blurred vision.
