Prevent visual eavesdropping by limiting the viewing angle of your 16in MacBook Pro M1/M2/M3/M4 screen

This Laptop Privacy Screen is compatible with the M1, M2, M3 and M4 16-inch MacBook Pro laptop computers. Gold Privacy Filters have a reflective surface that instantly transitions from a clear view to a mirror effect outside of the intended viewing angle, significantly improving visual privacy when working in an office or public environment.

Prevent Visual Eavesdropping

The gold security filter is a convenient solution that features a quick shift to a mirror-like effect to protect confidential data from unwanted viewers while maintaining a clear view of 60 degrees (+/- 30 degrees from the center) for the user.

Double-Sided Filter

The security screen protector features a glossy gold side for maximum privacy and an anti-glare matte side for environments prone to glare. The matte side provides additional screen protection with a scratch- and fingerprint-resistant coating.

Hassle-free Installation

The filter is an exact fit design that will not interfere with top-mounted webcams, sensors around the display, or when closing the lid. Affix the privacy screen shield using the included transparent and residue-free adhesive strips.

Blue Light Reduction

Reduce eye strain and improve visual comfort with this blue light-reducing privacy shield. It blocks 40% - 51% of the blue light emitted from the display in the 380nm - 480nm wavelength range. Digital eye strain can lead to symptoms like headaches, dry eyes, and blurred vision.
