Maximise your meeting space

A 180° field of view and 4K panoramic video ensure everyone is seen, even close to the screen or against the wall.

Outstanding audio quality

An array of 8 beamforming, noise-cancelling microphones and 4 powerful speakers delivers clear, room-filling sound.

Audio flexes with your needs

Add the PanaCast SpeakerMic to extend audio to the back of the room, with seamless sound mixing and flexible mounting options.

Natural, AI-powered meeting experiences

Dynamic Composition, Virtual Director, Intelligent Zoom, and Intelligent Meeting Space keep participants in frame and focused.

Quick, scalable installation

From box to meeting in minutes with in-box provisioning, multiple mounting options, and support for permanent BYOD mode.

Secure and easy to manage

Built on MDEP for secure, future-ready performance, and designed to work seamlessly with Microsoft Teams and Zoom.
