

Zebra RFD2000 RFID reader Black

Model: RFD2000-1000100-EU

Manufacturer: ZEBRA

EAN: 5704174145554

Product Code: 1437215

R16,089

HIGH-PERFORMANCE UHF RFID FOR ZEBRA'S TC20 MOBILE COMPUTER

If you have invested in Zebra's TC20 mobile computer, now you can simply slip the TC20 into the RFD2000 sled to add powerful UHF RFID capabilities. Purpose-built for the TC20, the RFD2000 delivers the same robust RFID performance you expect in a dedicated device — you no longer need to compromise performance for the flexibility to add and remove RFID as needed. The result is a winning combination — a complete retail solution that makes inventory management, superior shopper interactions and assisted selling a breeze.

SUPERIOR ERGONOMICS

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The RFD2000 was built with store associates and shoppers in mind. Superior ergonomics and a compact, lightweight design bring comfort, even to inventory management tasks. And, the modern design fits right into shopper-facing areas, even in the most design-conscious stores.

THREE FLEXIBLE MODES

Geiger-counter mode makes it easy to locate items for a shopper in minutes. Triggerless mode enables the continual capture of RFID tags, without the trigger, for fast, easy and comfortable inventory and cycle counts. And, the ability to write barcode data to RFID tags simplifies omni-channel inventory visibility and provides seamless flexibility for many in-store applications.

EASY ON, EASY OFF

The RFD2000 sled is easy to slip on and off the TC20 whenever there is a task requiring RFID. And, while the RFD2000 holds the TC20 securely in place, in seconds you can slip the RFD2000 off and return the TC20 to its natural compact and pocketable size.

SUPERIOR BATTERY POWER, MANAGEMENT

With the RFD2000 sled, your workers can count on full-shift power, even with the most intensive use. You get the longest battery life in this class, plus our unique power-optimizing battery technology and premium high-grade capacity cells. And with Zebra's PowerPrecision removable battery, you get the advanced battery statistics you need to monitor battery health — and easily spot and remove aging batteries that can no longer hold a full charge.
