The modern HP OneShred 15CC is perfectly suited for small office environments and yet compact enough to fit on any desk. The document shredder with a cutting capacity of 15 A4 sheets comes with the high security level P-4 and meets all requirements of DSGVO-compliant document destruction. In the particle cut, your personal documents such as payslips or tax documents are shredded into 4 mm x 35 mm small clippings. After a shredding process of ten minutes, the reliable companion requires a cool down period before it is ready for use again with its cutting speed of a sporty 1.8 metres per minute. Thanks to the anti-paper jam technology, the paper is automatically returned if you have accidentally fed more than 15 sheets.
