ASUS ROG Carnyx BLK Black Table microphone

Model: 90YH03Z0-BAUA00

Manufacturer: ASUS

EAN: 4711387377024

Product Code: 1440639

R5,055

Unleash the Power of Voice

The ROG Carnyx is a professional-grade cardioid USB microphone that features a 25 mm condenser capsule and 192 kHz / 24-bit sampling rate to deliver natural and rich sound. The Carnyx offers clean and uninterrupted recordings thanks to a high-pass filter that reduces low-frequency noise, a built-in pop filter to prevent vocal plosives, along with a metal shock mount to minimize external vibrations.

In addition to giving you studio-grade recordings, the Carnyx also features an intuitive one-touch mute button and multi-functional control knob to take your recording and streaming experiences to the next level.

STUDIO-GRADE 25 MM CONDENSER CAPSULE

Compared to standard microphones, the Carnyx’s larger 25 mm condenser capsule improves low-frequency performance and delivers rich, natural, and warm vocal tones.

192 KHZ / 24-BIT SAMPLING RATE

Lossless audio processing supports a high 192 kHz / 24-bit sampling rate to ensure high fidelity sound reproduction that reflects every nuance of your voice.

CARDIOID POLAR PATTERN

The cardioid polar pattern emphasizes sounds from the front and minimizes sound pickup from the sides and rear, making the Carnyx perfect for solo streams, gamers, and podcasters.

HIGH-PASS FILTER

The integrated filter cuts out unwanted low-frequency background noises below 80 Hz like rumbles or hums, this prevents your voice from sounding muddied and helps it stand out.

NOISE REDUCTION SOLUTION

METAL SHOCK MOUNT

The sturdy all-metal shock mount includes elastic suspension cables that isolate the mic from external vibrations like keystrokes or mouse clicks that often travel through the table.

BUILT-IN POP FILTER

The pop filter is made of foam and mesh layers to prevent plosive sounds when the mic is used up close.

One-Touch Mute Button

A quick touch of the mute button cuts off the microphone during recording. The touch button works silently so no sound is picked up by the mic for uninterrupted recording. Plus, an LED indicator lets you know when it’s activated.

*Touching and holding the button for 2 seconds also turns the RGB lighting on and off.

Real-Time Monitoring

A 3.5 mm headset jack allows you to monitor audio in real-time.

Multi-Functional Control Knob

Use the intuitive control knob to adjust microphone volume, and the multimedia audio volume for monitoring headsets, or to turn on/off the high-pass filter function.

FLEXIBILITY

READY, RIGHT OUT OF THE BOX

Plug the ROG Carnyx into any computer or laptop via its bundled USB cable and begin recording or streaming audio. The built-in mount adaptor fits 3/8-inch threads to ensure compatibility with most mic stands or boom arms.
