

InLine 17161I video cable adapter 1 m Black

Model: 17161I

Manufacturer: INLINE

EAN: 4043718336128

Product Code: 1441274

R1,407

Active signal conversion: Reliably connects HDMI signal sources to DisplayPort receivers via integrated converter.

Compatibility with UHD 4K60Hz: Supports high-resolution monitors and professional applications with up to 60 Hz refresh rate.

Includes USB power supply: Separate 5V/500mA supply via USB-C on HDMI side, adapter to USB-A included.

Rugged workmanship: High-quality materials, gold-plated contacts and durable sheathing for long-lasting use.

Versatile use: Ideal for workstations, conference rooms and digital signage in professional IT environments.

The InLine® HDMI to DisplayPort converter cable enables a reliable connection from HDMI signal sources such as PCs or notebooks to monitors with a DisplayPort input. The integrated active chipset converts the HDMI signal electronically so that even high-resolution content in 4K at 60 Hz can be

transmitted smoothly and in great detail. An additional voltage of 5V/500mA is required on the HDMI side for the power supply. A short USB cable (USB-C with adapter to USB-A) is included for this purpose, which can be flexibly connected to USB ports. The cable is particularly suitable for use in professional environments such as system houses, offices or industrial facilities where HDMI outputs need to be combined with modern DisplayPort displays. Thanks to its robust workmanship and gold-plated contacts, stable signal transmission is guaranteed even during prolonged use. The different cable lengths offer maximum flexibility for different installation requirements.

HDMI plug to DisplayPort plug

Supports display resolutions up to UHD 3840x2160 @60Hz

USB cable: 0.3m length, USB-C plug incl. USB-A adapter

Colour: black

Packaging: resealable PE bag with EAN code
