R1,003

Standard cup brushes work fine on larger surfaces, but they are not always the best choice when you need to clean a workpiece with areas that are hard to reach. The durable PRO Metal clean Bevel Brush has a sloping shape, so you can get at tighter spots easier.

The PRO Metal clean Bevel Brush is a durable accessory you want to have at hand in your metal shop. We fitted it with premium knotted wire to ensure it will get your lighter cleaning jobs done. The sloping position of the wires helps you get at smaller steel surfaces, grooves, and edges easier – time and again.
