# InLine Screw set 32 pieces for beamer brackets

Model: 23100B

Manufacturer: INLINE

EAN: 4043718310456

Product Code: 1448170

## R798

**Wide selection for projector installations:**The set contains common screw types in the M3 to M6 range and supports flexible mounting on suitable brackets.
**Efficient work on site:**The different screw lengths and diameters reduce delays during installation and enable structured workflows.
**Precise fit:**Washers compensate for the different housing variants of many projectors and ensure a secure connection to the mount.
**Reliable replacement solution:**Missing parts on projectors can be quickly replaced with the set without the need for manufacturer-specific components.

The InLine® screw set offers a functional selection of fastening components for mounting projectors on compatible mounts. The various screw types in the M3 to M6 range cover the typical requirements of many projectors and support secure device installation. Thanks to its compact composition, the set can be used flexibly in installations where suitable screws are missing or need to be supplemented.
Washers in graduated sizes allow precise adjustment to different housing shapes. They reliably

compensate for design features and facilitate a secure connection between the device and the mount. The clear sorting of the screws and washers allows quick access to the required elements and supports an efficient installation process.
The InLine® screw set is ideal as a replacement solution when incomplete or missing screw deliveries make installation difficult for projectors. The selection of relevant screw variants facilitates planning and ensures reliable results when installing various devices. The set is therefore a practical addition for applications where a secure and stable connection is required.
