GIGABYTE GeForce RTX 3050 OC Low Profile 6G NVIDIA 6 GB GDDR6

Model: GV-N3050OC-6GL

Manufacturer: GIGABYTE

EAN: 4719331354268

Product Code: 1448972

R9,646

GIGABYTE

CUSTOM-DESIGNED COOLING SYSTEM

GIGABYTE's custom-designed cooling system delivers effective heat dissipation capacity, featuring copper heat pipe that makes direct contact with the GPU. This facilitates enhanced heat transfer to the heatsink, allowing for higher performance at lower temperatures.

LOW PROFILE DESIGN

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

At just 181mm in length, the card is perfect for compact builds. An additional low-profile bracket is included for seamless adaptability to different build needs.

AMPLE CONNECTIVITY

Enjoy versatile display options with two DisplayPort and two HDMI ports, supporting up to 4 displays simultaneously.

ULTRA DURABLE

ULTRA COOLING

Lower RDS(on) MOSFETs are specially designed to produce lower switching resistance for faster electric current charging and discharging at extremely low temperature.

LOW POWER LOSS

Metal Choke hold energy much longer than common iron-core chokes at high frequency, thus effectively reduce core energy loss and EMI interference.

LONGER LIFE

Lower ESR Solid Capacitors ensure better electronic conductivity for excellent system performance and longer lifespan.

FRIENDLY PCB DESIGN

Fully automated production process ensures top quality of the circuit boards and eliminates sharp protrusions of the solder connectors seen on the conventional PCB surface. This friendly design prevents your hands from getting cut or inadvertently damaging components when making your build.

GIGABYTE CONTROL CENTER

GIGABYTE CONTROL CENTER (GCC) is a unified software for all GIGABYTE supported products. It provides an intuitive interface that allows users to adjust clock speed, voltage, fan mode and power target in real-time.
