VALOR AIR PLUS

ENDLESS POSSIBILITIES

XPG VALOR AIR PLUS mid-tower PC chassis offers a robust platform for future upgrades, accommodating mid-to-high-end components, including most RTX 40 series GPUs. Its high-airflow magnetic front panel enhances visual appeal, especially with ARGB fans, while ensuring superior ventilation. With 4x pre-installed 120mm ARGB fans included in select models, it delivers optimal cooling performance right out of the box.

High-airflow magnetic front panel

Supports cooling configurations with up to 6x 120mm fans and 360mm radiators

Supports graphics cards up to 340mm long

High-Airflow Magnetic Front Panel

XPG VALOR AIR PLUS comes with a high-airflow magnetic front panel that allows better ventilation of your system and ensures efficient air intake to keep internal components cool.

Putting the Air in Airflow

XPG VALOR AIR PLUS supports up to 6x 120mm fans. Certain models come with 4x pre-installed ARGB fans, with 3x in the front and 1x in the rear. You can customize the lighting with supported motherboard software or XPG PRIME ecosystem management software. The easily removed magnetic front panel also allows you to clean the included dust filter to maintain optimal airflow while keeping dust out of the case.

Highly Compatible

XPG VALOR AIR PLUS supports mini-ITX, micro-ATX, and ATX motherboards, offering versatile building options for both entry-level and high-performance gaming PCs.

Room to Dominate

XPG VALOR AIR PLUS supports graphics cards up to 340mm long, accommodating most RTX 40 series GPUs, including the NVIDIA GeForce RTX 4090 Founders Edition.

Water & Air

XPG VALOR AIR PLUS supports a 360mm radiator in the front, a 240mm radiator in the top, or a 120mm radiator in the rear. For air cooler users, this chassis supports coolers up to 160mm tall, accommodating most top-selling models.

Can You Fit It?

XPG VALOR AIR PLUS supports up to 3x 2.5" SSD or 2x 3.5" HDD storage components, featuring a removable HDD tray for effortless upgrades. Additionally, it accommodates high-end power supplies up to 170mm in length, such as the XPG CYBERCORE II Series.

Maximum Dust Protection

With removable dust filters located at the front, top, and bottom, cleaning becomes nearly effortless. These filters can be easily removed, cleaned, and replaced, making it simple to reduce dust accumulation on internal components, ensuring cleaner air inside the case and prolonging the lifespan of your hardware.
