Dream, Design, Deliver with our 3M™ VHB™ Tape 5925. It is a black, 0.6 mm thick, modified acrylic adhesive with a very conformable foam core. It can replace rivets, welds and screws. The fast and easy to use permanent bonding method provides high strength and long-term durability. It offers design flexibility with its viscoelasticity and powerful ability to bond to a variety of surfaces, including most powder coated paints.

Bond a variety of substrates at a high, medium and medium/low surface energy level with 3M™ VHB™ Tape 5925. Our conformable, double-sided, pressure-sensitive, closed-cell acrylic foam tape works at optimum adhesion when the bonding surfaces are clean, dry and well unified.
