GKM 18V-50 Professional: Further information

Product Highlights

The GKM 18V-50 Professional metal circular saw makes work fast and cuts precise. Other advantages include nearly spark-free working thanks to an integrated and robust chip collection box that features an easy-to-open door to empty it. With a cutting line indicator, a viewing window, and an integrated LED light, it ensures a shadow-free view and accurate cuts. Its handling is ergonomic and less tiring through an optimised grip for easy sawing in a wide range of positions.

Equipment & Application

The GKM 18V-50 Professional is the specialist for quick and precise sawing of metal, particularly of cable trays or threaded rods and of steel (ferrous metal). It is compatible with all Bosch Professional 18 V batteries and chargers (Professional 18V system).

Additional Information

The GKM 18V-50 Professional is equipped with a saw hook and a special 'Standard for Steel' saw blade, optimised for cordless saws to maximise battery runtime.
