Universal, secure, height-adjustable tablet holder for retail and business environments

This universal floor-standing tablet mount from Manhattan is designed for easy interaction in public areas. Place it anywhere, with the additional option of bolting it to the floor for tamper-proof support. As a retail-inspired, anti-theft tablet holder, you can use it as a point-of-sale terminal, for hotel guest registration, to show digital signage at trade show booths and all high-traffic areas. It is compatible with iPad®, Samsung® and Microsoft® tablets plus many more.

Fully adjustable

Full 360° rotation lets you position your tablet in landscape or portrait orientation and everything in between. Optimize your view and reduce glare with +20° to -110° tilt. The pole can be height-adjusted from 790 to 1190 mm (31.1 to 46.9 in.) to raise the tablet to its best position for your purpose.

Universally compatible

The adjustable holder clamps accommodate 7.9" to 11" tablets of every brand while leaving ports, buttons and front/rear cameras fully accessible. Its soft back and included foam pads prevent scratches to your device.

Security first

Protect your expensive tablet from theft and tampering, especially in cases where you need to leave it unattended. Bolt the stand to your floor - the packaging includes all the fasteners you need. Also included is a wrench key that locks the clamps and protects the tablet from being stolen.

Clean-looking, clutter-free cable management

Cable management inside the pole keeps your cords concealed and organized to give a professional look to the installation.
