Moza Racing Performance Kit for CRP2

Model: RS069

Manufacturer: MOZA RACING

EAN: 6973137270636

Product Code: 1457955

R1,153

The Performance Kit for CRP2 allows you to fully customize the braking feel of your pedals, simulating the hard brake feel of top-tier race cars like F1 and F2. With 10 springs, various damping blocks, and an aluminum block, this kit offers 1,764 possible configurations, letting you fine-tune the pedal response and travel to your preference. Whether you prefer a linear braking experience or minimal pedal travel, this kit provides the tools to optimize your performance.

Optional Performance Kit

The Performance Kit includes 10 springs, various damping blocks, and a metal block. Combined with the original damping blocks, it offers 1,764 possible pedal feel configurations, simulating the hard brake feel of top-tier race cars like F1 and F2, with nearly zero brake force response time.

Performance Customization Options
