

LevelOne 48V DC Industrial Power Supply, 120W, DIN-Rail, PoE Ready

Model: POW-4841

Manufacturer: LEVELONE

EAN: 4015867206492

Product Code: 1462193

R2,770

The LevelOne POW-4841 is a 48V DC industrial power supply delivering 120W on a standard 35 mm DIN rail. Universal AC input from 90V to 264V works globally, and the 48V output suits PoE switches, injectors, and telecom-grade equipment.

Fanless free-air convection cooling means silent operation and no fan to fail. Full protection suite — short-circuit, overload, over-voltage, and over-temperature — keeps the supply and downstream loads safe when a fault occurs in the field.

Built for industrial control cabinets, factory automation lines, semiconductor fabrication tooling, and electro-mechanical apparatus where 120W of clean 48V DC is needed in a compact DIN-rail format.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
