

Techly ICOC-DVI-811C DVI cable 10 m DVI-D Black

Model: ICOC-DVI-811C

Manufacturer: TECHLY

EAN: 8057685305182

Product Code: 1462503

R1,574

DVI technology is very important because it increases the quality of the video signal without any loss of signal information. In fact there is no more analog / digital conversion, nor on the video card or the monitor, since the signal in the digital part of the new video cards (and also from new motherboards Intel) and goes directly to the LCD monitor in digital.

The family of connectors MicroCross DVI[™] is based on an innovative technology that provides high-speed performance of the electrical connector in a low cost. These and other benefits allow this system to be chosen as the interface for Digital Display Working Group and Digital Visual Interface (DVI) standard. Systems with DVI connectors MicroCross provide for a high frequency band video between the computer (host) and display devices (monitors) digital.
