USB-C to HDMI Adapter to connect a laptop, MacBook®, smartphone or tablet to an HDMI display - plus USB-A peripheral and Power Delivery charging port

The Manhattan USB-C 3-in-1 HDMI Docking Converter with Power Delivery establishes a fast, simple and convenient link between newer USB type-C equipped media sources (laptops, PCs, MacBooks, Chromebooks, computers, tablets, etc.) and existing HDMI displays (monitors, TVs, and projectors) for 4K at 30 Hz images in either mirror- or extended-display mode. Create a mini-workstation by adding any USB 3.2 Gen 1 (formerly USB 3.0) peripheral such as a mouse, keyboard, hub, external memory device and more with the integrated USB-A port. This multiport Docking Converter is easy and quick to install. No complicated configuration or setup is required to enhance the functionality of your USB-C device. Its all-in-one design achieves a compact, integrated solution that eliminates unnecessary cables, tangles and clutter to keep installations and workspaces neat and orderly.

Up to 100 W charging power with USB-C Power Delivery (PD)

The included USB-C PD port lets you charge your notebook with power up to 100 W while simultaneously charging your other mobile devices, such as smartphones or tablets, through the USB-A port. The Power Delivery function also provides faster charging than standard chargers since it determines the power needs of compatible devices and supplies it at the quickest and safest rate.

Take your phone to the big screen

If you have a smartphone or tablet that supports video output over USB-C DP Alt Mode, you can enjoy your apps and media even more. Watch a video on your monitor or flip through the slides of your presentation on a projector - all from your phone.

A multiport adapter that's made to go where you go
