Protect sensitive information by keeping on-screen data private

This privacy screen is designed for the curved 34-inch Dell P3424WE 21:9 ultrawide monitor, effectively obscuring sensitive on-screen information and ensuring that both the center and outer edges of the screen are shielded from unwanted views.

Prevent Visual Eavesdropping

This privacy filter is a convenient and cost-effective solution to protect confidential data from unwanted viewers. The privacy shield obscures the computer's screen from the sides while providing an approximate viewing angle of 60 degrees (+/- 30 degrees from the center) to the user. The security shield also features blue light reduction, blocking between 40% to 51% of the blue light emitted from the display in the 380nm - 480nm wavelength range.

The privacy shield has a light transmittance of 65% providing optimal screen brightness and enhanced levels of privacy.

Double-Sided Filter

The privacy screen protector is double-sided, with a matte anti-glare side for environments prone to glare and a high-gloss side that helps retain color vibrancy. The matte side provides additional screen protection with a fingerprint and scratch-resistant coating.

Hassle-Free Installation

Easily install the glossy or matte side of the privacy screen protector using the included adhesive strips; Optional mounting tabs are included for additional support on lower bezel.
