
AG Neovo TTN-4301 Digital signage flat panel 109.2 cm (43") LCD 450 cd/m² 4K Ultra HD Black 24/7

Model: TN431011M1010

Manufacturer: AG-NEOVO

EAN: 4710739598216

Product Code: 1466420

R31,438

43" 4K Commercial-grade LCD Display for Video Surveillance

Unmatched Clarity and Reliability for High-Stakes Surveillance

The TTN-4301 43” LCD display is engineered for critical surveillance in environments like transportation hubs, retail stores, and manufacturing sites, offering exceptional operational excellence 24/7. Its robust construction ensures longevity, and its comprehensive connectivity

alongside advanced remote management capabilities streamline operations. Designed specifically for crucial surveillance and property security, the TTN-4301 delivers crystal-clear, detailed video footage with 4K resolution, boosting security efficacy in demanding conditions.

Unyielding Reliability and Durability

Exceptional Front Protection

Experience outstanding durability with our IP22-rated LCD display, crafted to withstand dust and water. The front panel is enhanced with IK08 hardness glass, providing superior scratch resistance and maintaining clarity and resilience over time.

Superior Backside Endurance

Fortified with an IK10-rated housing, the LCD display offers unrivaled protection against vandalism, ideal for use in public spaces and areas without supervision. Its durable metal casing supports effective heat dissipation, ensuring consistent performance under continuous operation.

Designed for Non-Stop Performance

Advanced Thermal Management

An innovative heat control sensor and a fan-based cooling system actively manage temperatures, maintaining reliability 24/7. Exceeding temperature thresholds triggers alarms, preventing overheating for consistent performance.

Energy Efficiency

EcoSmart Technology dynamically adjusts backlighting based on environmental lighting, reducing power consumption by 30-50%. This feature not only saves energy but also supports sustainable operation, essential for businesses aiming to minimise their ecological impact while maintaining constant surveillance.

Optimal Image Quality Assurance for video surveillance

Consistent Clarity & Extended Lifespan

Anti-burn-in technology prevents static image degradation, preserving image quality over time and maintaining the clarity and accuracy of surveillance footage, critical for security analysis and decision-making.

4K Resolution for Unmatched Detail

Elevate your surveillance with our LCD display’s 4K resolution, providing brilliant clarity and detail. This high-definition feature ensures every surveillance footage pixel is sharp, facilitating the identification of fine details and critical visual information.

Night Surveillance Enhancement

Our LCD displays enhance black levels to reveal details in night-captured surveillance footage, ensuring even scenes recorded at night are presented with clarity, aiding in thorough monitoring and analysis.

Sharper Images & Improved Recognition

By increasing image sharpness and detail, the LCD display facilitates easier identification of texts, objects, and activities within the surveillance footage, a critical factor in accurate surveillance and security operations.

Seamless Integration and Enhanced Control for Superior Surveillance

Comprehensive Device Integration

A wide range of input options ensures compatibility with various surveillance devices, simplifying system integration for a cohesive and efficient setup.
