Cut-outs for the latest Raspberry Pi® 4 Model B connections are already available and so the Raspberry Pi® can be connected and used immediately after installation.

HAT - stands for Hardware Attached on Top

Raspberry Pi® computers are great for everyday tasks, but sometimes you want to add one of the additional hardware controllers at the market. Thanks to their GPIO headers, most Pi® computers can support an additional HAT module, but enclosures not. No problem with the IB-RP110.

Stay cool

Install your own 30 mm fan to enforce the heat dissepation of your Raspberry Pi® by using the second top cover with support for fan installation.
