

Ugreen 70336 interface hub USB 3.2 Gen 1 (3.1 Gen 1) Type-C 5000 Mbit/s

Model: 70336

Manufacturer: UGREEN

EAN: 6957303873364

Product Code: 1472555

R829

Introducing the UGREEN 4 Ports USB C to USB 3.0 Hub, the perfect accessory for work and travel that expands the capabilities of your USB Type C devices. With 4 USB hub 3.0 Ports that transfer data at a super speed rate of up to 5Gbps, you can connect more devices such as a keyboard, mouse, USB flash drive, thumb drive, USB printer, and hard disk all at the same time.

With a built-in USB-C power supply port that supports up to 5V 2.4A power, this USB C hub adapter is perfect for power-hungry devices such as 2.5/3.5 USB HDD/SSD. Please note that the USB-C power port is used for multi-interface high-power device functions powered support, and cannot be used to charge terminal devices.

Designed in premium stylish space gray, this USB Type C hub adapter is not only aesthetically

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. pleasing, but also practical. It is easy to use with plug and play technology and requires no software or drivers. The hub also features built-in over-current, over-voltage, and reverse current protections, and supports hot-swapping, making it stable and secure to use.

The USB C hub adapter is also universally compatible with devices such as 3 MacBook Pro/MacBook Air 2022/2021, iPad Mini 6/5, iPad Pro/iPad Air 5/4, Surface Book 2, XPS 17/15, Galaxy S22/S21, and other USB C/Thunderbolt smartphones/laptops/tablets. It is portable and lightweight with a 15cm length cable, so you can easily carry it in a backpack or computer bag without any extra burden.

Please note that USB 3.0 performance (super-speed of up to 5 Gbps) can only be expected when connected to a USB 3.0 port, USB 3.0 cables, and USB 3.0 devices. Otherwise, it will work as a USB 2.0 or USB 1.1 hub when connected to a USB 2.0 or USB 1.1 controller respectively. Also note that the USB 3.0 port is designed for data transfer, not charging your devices.

In summary, the UGREEN 4 Ports USB C to USB 3.0 Hub adapter offers stable and secure data transfer, power supply support for power-hungry devices, and the ability to connect more USB peripherals to your USB Type C devices. It is universally compatible, portable, and designed to save you space and precious time.
