Print large volumes of high-quality business documents while making huge savings on CPP and TCO with this refillable and easy to use 3-in-1 MegaTank-equipped MAXIFY GX printer.

Brilliant productivity, best-in-class CPP and TCO

Cost per page (CPP) is the amount of money that it takes to print a single page. This is determined by dividing the cost of the ink by the page yield.

The total cost of ownership (TCO) is a calculation of what a printer would cost you based on the initial purchase cost of hardware plus the costs of ink over a fixed period.

Low running costs, brilliant productivity
